

Birdwatching in Singapore

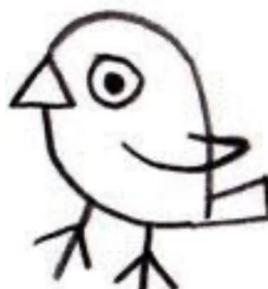

What Are Birds?

Is it a bird?

- Feathers
- Beak
- Wings
- 2 legs
- Lays eggs

Why Birdwatch?

1. Appreciate biodiversity and be more in touch with nature
2. A start point for environmental conservation
3. Great for relaxing and family bonding

How Many Bird
Species Does
Singapore Have?

429

(as of 1 Mar 25)

What Makes Singapore a Good Place for Birds?

1. Warm, wet, and stable climate provide an abundance of resources
2. Diverse habitats (urban streetscape, parks, forests, mangroves, coasts, etc.)
3. Located along the East-Asian Australasian Flyway, making Singapore an ideal pitstop for migratory birds
